PMC Silver Clay Workshop

We run our jewelry making courses in an exciting, versatile new material called Precious Metal Clay (PMC). This material enables individuals with no prior silversmithing experience to produce fantastic designs in pure silver (99.9%). Silver Clay is a combination of water, binders, and small particles of silver. It is molded by hand into a desired shape then heated in a kiln to remove the binder and fuse the metal powder into a solid form. The result retains all the marks of the maker, transformed into a precious and durable object.
